

User stories: AI (email) assistant

User stories:

As a user, I want the AI assistant to ensure that my email responses are coherent and accurate, taking into account the context of the email conversation, thereby enhancing the authenticity and value of my communication.

Acceptance Criteria:

- The AI assistant accurately interprets the context and content of the incoming emails.
- The AI assistant generates clear and coherent responses based on the email conversation.
- The AI assistant allows me to review and modify the generated responses before sending them.

As a user, I want the AI assistant to incorporate social norms and ethical considerations in composing my emails, ensuring the interactions are respectful, appropriate, and in line with my personal or business communication style. Acceptance Criteria:

- The AI assistant has an understanding of social norms and ethical considerations in communications.
- The AI assistant respects these norms when generating responses or composing emails.
- The AI assistant allows me to define my communication style and preferences to tailor its responses accordingly.

As a user, I want the AI assistant to compose emails that come across as authentic and not artificial, improving the communication experience for both me and my recipients.

Acceptance Criteria:

- The AI assistant uses natural language processing to compose emails that sound human-like.
- The AI assistant maintains consistency in the tone and style of the emails.
- The AI assistant's composed emails are indistinguishable from a human-composed email in terms of style, tone, and content.

As a user, I want the AI assistant to ensure the information in my emails is accurate and reliable, thereby enhancing the credibility of my communication.

Acceptance Criteria:

- The AI assistant cross-checks information in the email with reliable sources before sending.
- The AI assistant flags any potential inaccuracies or misleading information.
- The AI assistant suggests amendments or improvements to ensure the accuracy of the information.

As a user, I want the AI assistant to provide suggestions for improving the quality of my email content, enhancing my overall communication effectiveness

Acceptance Criteria:

- The AI assistant analyzes the content of the email for clarity, coherence, and effectiveness.
- The AI assistant offers suggestions for improving email content, such as rephrasing sentences, correcting grammar, or enhancing vocabulary.
- The AI assistant presents these suggestions in an intuitive and user-friendly manner, allowing me to accept or reject changes as per my preference.
