

User stories: AI (email) assistant

As a user, I want to be able to compose and send emails using natural language commands through the AI assistant, ensuring that my messages are accurately transcribed and delivered to the intended recipients.

Acceptance Criteria:

- The AI assistant accurately captures and understands my voice commands for composing emails.
- The AI assistant transcribes the voice commands into text without errors.
- The AI assistant sends the composed email to the specified recipients successfully.
- The AI assistant provides a confirmation message indicating that the email has been sent.

As a user, I want the AI assistant to categorize and prioritize my incoming emails, helping me quickly identify and respond to urgent messages while filtering out spam and irrelevant content.

Acceptance Criteria:

- The AI assistant accurately analyzes the content and context of incoming emails.
- The AI assistant distinguishes between urgent and non-urgent emails based on predefined criteria (e.g., sender, subject, keywords).
- The AI assistant provides a clear visual or auditory notification for urgent emails.
- The AI assistant automatically filters spam emails into a separate folder.

As a user, I want the AI assistant to intelligently suggest email responses based on the content of incoming messages, saving me time and effort in composing replies.

Acceptance Criteria:

The AI assistant analyzes the content of incoming emails and generates relevant and contextually appropriate response suggestions.

- The AI assistant presents the response suggestions in a user-friendly interface.
- The AI assistant allows me to select and customize the suggested responses before sending them.
- The AI assistant continuously learns and improves its response suggestions based on user feedback and preferences.

As a user, I want the AI assistant to provide me with reminders and notifications for important emails, ensuring that I never miss a crucial message or deadline.

Acceptance Criteria:

- The AI assistant allows me to set reminders for specific emails or conversations.
- The AI assistant sends timely notifications for upcoming deadlines or important messages.
- The AI assistant provides options to snooze or dismiss reminders as per my preference.
- The AI assistant syncs reminders across devices for seamless access and consistency.
-

As a user, I want the AI assistant to search and retrieve specific emails or information from my inbox quickly and accurately, enabling efficient information retrieval.

Acceptance Criteria:

- The AI assistant offers a robust search functionality that allows me to search for emails based on keywords, sender, subject, and other relevant criteria.
- The AI assistant displays search results promptly and accurately, prioritizing the most relevant emails.
- The AI assistant supports advanced search filters and operators to refine search queries.
- The AI assistant provides options to sort and organize search results based on different parameters (e.g., date, relevance).
